Envirolast XT™ Wood Stain and Seal

- Envirolast XT is a waterborne oil/alkyd exterior wood stain with no carbon polluting solvents, so it is virtually zero VOC. Tested by SCQAMD.
- Immediate recoat - labor saving benefits.
- Temperature flexibility down to 35 degrees.
- Soap and Water clean-up
- Non-Flammable

Spray-Stone® Limestone Plaster

50lb pail of white (untinted) thin coat decorative lime plaster. Product may be brushed, rolled or spray applied to a variety of interior and exterior substrates. A great 'high-end' finish for all residential and commercial applications. By varying troweling methods, it is possible to recreate a variety of looks that can enhance many of today's modern reinterpretations of classic architectural themes. There simply is no comparison to a traditional painted surface.

Spray-Stone® Sealer

Spray-Stone Sealer can be applied over the finished surface, enhancing and accentuating the colors chosen. It will provide a soft non-luster, water resistant finish. However, the sealer is not necessary if the desired look is achieved without it.

Benefits of SprayStone®:

- Superior durability
- Eco friendly
- Variety of color
- Spray-Stone® is Mold Resistant
- Affordable
- User friendly
- Easy to apply
- Minimal application odor
